

np Safelock-Cap tube

The new optimal lid-mechanism of our **np Safelock-Cap** tube avoids accidental opening of the lid during centrifugation and thermal stress.

Sealing of the lid is guaranteed

- with **up to 30.000 x g** centrifugal impact,
- during thermal exposure in incubation or in a boiling water bath **up to 100° C**.

All users were additionally convinced by the following benefits and advantages:

“HIGH SPEED PROTECTION”

Exceptional stability and highest safety in your centrifuge.

“PRECISE LID-FIT”

Hardly any evaporation and sample loss thanks to high quality lid-fit.

“EASY SAMPLE IDENTIFICATION”

Frosted labelling space on lid and side.

“CRYSTAL CLEAR”

Extremely clear product thanks to selected and particularly clear polypropylene, for perfect optical inspection of your sample material.

“EASY TO USE”

Especially user-friendly thanks to our exceptionally designed lid rim.

“AUTOCLAVABLE”

121° C, 1 bar, 15 minutes
